QUICK SOLUTIONS ENGINEERING

Established in 2016, **Quick Solutions Engineering** brings over a decade of proven industry experience in delivering innovative, integrated engineering solutions.

We offer a comprehensive portfolio of services across electrical, mechanical, instrumentation, and automation systems, along with energy efficient technologies, solar power, biomass fueled energy, and steam generation solutions. Additionally, we specialize in the commissioning, operation, and maintenance of complete plants in the food, textile, and apparel sectors, ensuring seamless performance and long term reliability for our clients.

We Live Up To Our Name By
Delivering Fast, Reliable And
Expert Solutions.

ABOUT COMPANY

Quick Solutions Engineering delivers comprehensive end-to-end engineering solutions spanning instrumentation & automation, electrical panel design, supply, and installation, mechanical fabrication, utility systems, solar energy integration, full-cycle food plant erection and commissioning. Complementing our core engineering services, we also provide specialized consultancy to the apparel and textile industries.

Guided by a steadfast emphasis on innovation, quality, and reliability, we empower industrial clients to enhance operational performance, maximize efficiency, and achieve seamless system integration through customized solutions and superior grade products tailored to their unique needs.

What **DRIVES** us

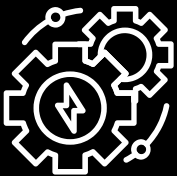

Excellence

Excellence, innovation, and reliability are at the heart of everything we do. We build lasting partnerships with our business partners through mutual trust and a shared focus on delivering results that consistently surpass expectations.

Our **COMMITMENT**

Performance

We are committed to delivering tailored solutions that enhance operational efficiency and ensure reliable performance. Guided by a steadfast focus on quality, professionalism, and your unique objectives, we customize every service to meet your specific needs.

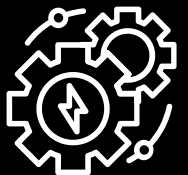

Our MISSION

We deliver innovative engineering solutions that consistently outperform client expectations while advancing sustainable growth, energy efficiency, and robust utility systems. Through excellence, professionalism, and a forward-thinking approach, we empower industries to thrive in an ever evolving landscape.

Our VISION

To become a globally recognized leader in engineering and automation, empowering industries through continuous innovation, adaptability, and sustainable progress. At **Quick Solutions Engineering (QSE)**, we collaborate with leading technology partners and invest in renewable energy and energy efficient solutions to build smarter, more resilient and future ready systems.

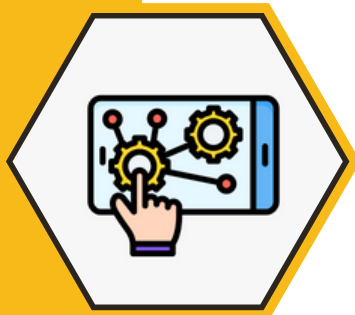

SERVICES

WE OFFER

Instrumentation Services

Delivering precision engineered instrumentation solutions that ensure accurate, reliable, and efficient performance across industrial processes.

Process Control & Automation

Optimize industrial operations through customized automation strategies and advanced process control systems, enhancing precision, efficiency and scalability.

Electrical Panels Supply & Services

With over a decade of industry experience, our dedicated team delivers end-to-end, turnkey solutions for electrical panel fabrication and installation. Our expertise spans a wide range of systems, including distribution panels, LV switchgear panels, motor control centers (MCCs), automatic transfer switch (ATS) panels, changeover panels, and the installation of power and control cabling ensuring reliability, compliance and operational efficiency.

SERVICES

WE OFFER

Custom SCADA Solutions | Reporting & Logging

Tailored SCADA systems designed to enable intelligent monitoring, real time data analytics, and secure, comprehensive reporting and logging empowering through data driven decision making and operational excellence.

After Sales Services

Dedicated post installation support to ensure the sustained performance, reliability, and optimal functionality of your systems throughout their lifecycle.

Electronic Repairing Services

Expert repair and diagnostics of electronic components, performed in our state of the art laboratory to ensure precision, reliability and swift turnaround.

Engineering Solutions

Innovative, expertly engineered solutions designed to address complex industrial challenges with creativity, precision and technical excellence.

SERVICES

WE OFFER

Industrial Fabrication Engineering Solutions

Our skilled technical team delivers comprehensive mechanical fabrication and engineering services tailored to overcome diverse industrial challenges with precision, innovation, and reliability. Our capabilities include:

- Structural fabrication
- Pipeline fabrication and assembly
- Equipment installation and alignment
- Machine utility integration (power, air, water, etc.)
- Maintenance, retrofitting & system modifications
- Supply and installation of cable trays and mesh trays

From concept to completion, we ensure robust, code compliant, and operationally efficient solutions that support seamless plant operations and long term performance.

Inspection & Testing OEM machines

Make confident, informed investment decisions with our professional OEM machinery inspection services. Our qualified team performs comprehensive mechanical, electrical, and performance evaluations to accurately assess equipment condition, functionality, and readiness ensuring reliability, value, and operational integrity before purchase or commissioning.

SERVICES

WE OFFER

Consultancy Services from Greige fabric to finishing

Our team of seasoned textile experts offers comprehensive, end-to-end consultancy across the entire fabric processing value chain from greige (unfinished) fabric to final finishing. We provide specialized guidance and technical support in all critical stages, including:

- Singeing
- Desizing
- Bleaching
- Drying
- Mercerizing
- Dyeing
- Washing
- Drying (post treatment)
- Finishing (Mechanical & Chemical)
- Quality Inspection
- Packaging

Our holistic approach ensures process optimization, consistent quality, regulatory compliance, and operational efficiency enabling textile manufacturers to deliver superior finished products to the global market.

SERVICES

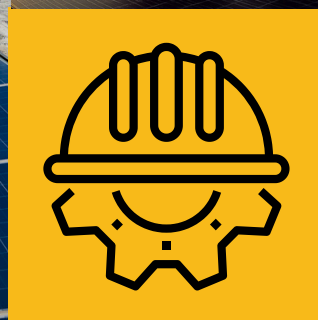

WE OFFER

Renewable Energy solutions

Our technical team provides comprehensive renewable energy solutions, designing and installing solar power systems from 1 MW and above, tailored to the needs of industrial, commercial, and utility scale clients.

We offer **Shariah-compliant**, interest free installment plans to support accessible and ethical financing. Additionally, customers can opt to **repay the system cost through convenient, structured payments via their electricity bills enabling a smooth, sustainable transition to clean, reliable energy at scale.**

FOCUS INDUSTRIES

Our integrated engineering and automation services are designed to help businesses optimize operations, enhance performance, and achieve their strategic objectives across a diverse range of sectors. We bring tailored expertise to the following industries:

- Food Processing
- Apparel Manufacturing
- Textile Manufacturing – including spinning, weaving, wet processing, dyeing, and finishing
- Rubber & Polymer – specializing in injection molding and extrusion systems
- Packaging – end-to-end automation for flexible and rigid packaging lines
- Pharmaceuticals – covering sterile plant setup, injection filling, blister packaging, and powder filling systems
- Edible Oil & Ghee Production – from extraction to refining and packaging

By combining industry-specific knowledge with cutting-edge technology, we deliver scalable, reliable, and future-ready solutions that drive efficiency, compliance, and growth.

WHY CHOOSE US

Technically Proficient
Team with Cross-
Industry Expertise:

Our engineers and technicians bring hands on experience across food, textile, apparel, pharmaceuticals, rubber, packaging, and edible oil sectors ensuring deep contextual understanding of your operational challenges.

Field-Proven,
Practical Solutions:

We prioritize real world applicability over theoretical approaches delivering robust, tested strategies that work reliably in live plant environments.

Customized to Your
Facility:

Every solution is meticulously tailored to your plant's layout, process requirements, and existing infrastructure maximizing compatibility and minimizing downtime.

Cost-Effective
Upgrades over Full
Replacements:

We specialize in optimizing, retrofitting, and modernizing existing systems extending asset life and delivering significant savings compared to costly capital replacements.

WHY CHOOSE US

Unwavering
Commitment to
Quality &
Compliance:

From design to documentation, we adhere to international standards (including FAT/SAT protocols) and maintain comprehensive records for traceability, audits, and future scalability.

Enduring Partnership
& Long-Term
Support:

Our relationship doesn't end at commissioning, we provide responsive after sales service, maintenance guidance, and performance monitoring to ensure sustained operational excellence.

YOUR TRUSTED **ENGINEERING PARTNER**

Thank you for taking the time to review our company profile. At **Quick Solutions Engineering (QSE)**, we are committed to delivering innovative, reliable, and efficient engineering solutions by combining advanced technology with practical expertise. We look forward to the opportunity to work with you and contribute to your success.
